MENTOR'S MESSAGE

"Your success will be determined by your own confidence and fortitude."

Self-confidence allows us to face our failure and own up to it in a positive light. Moreover, it helps us to rise many times. This helps instill a quality in us which ensures we do not give up till we succeed. Similarly, self-confidence instils optimism in us.

People who have self-confidence are not lucky, they are smart. They do not rely on others to achieve success, they rely on their own abilities to do that. While self-confidence is important, it is also important to not to become overconfident. As we know, anything in excess can be bad for us. Similarly, overconfidence is also no exception. When you become overconfident, you do not acknowledge the criticism. When you don't do that, you do not work on yourself. Thus, it stops your growth. Overlooking all this will prove to be harmful. So it is essential to have moderation which can let you attain just the right amount of self-confidence and self-love which will assure you success and happiness in life.
